Garden of Spells

ss 24

The „Garden of Spells“ collection is inspired by the multi-faceted desert culture of Morocco and appeals to all our senses.

Sand dunes, pink granite, tiles of beautiful arcades, picturesque clay villages and deep green palm oases spring to life in a variety of bright designs and detailed elements.

Vermilion, sage, sand, lime, powder pink, emerald and amethyst blend into colors from 1001 Nights.

With a lot of passion we develop all our designs in our Cologne studio. During this process, the ambition to design unique fashion with the most beautiful prints and lovely details, using only the best materials, is uncompromising.

Many new impulses and developments are the spotlight to our 2024 summer collection, it shows printed knits, delicate voile fabrics combined with sporty cargo styles, padded reversible silk jackets matched with wide-leg jersey trousers.

An exciting mix of femininity, fitted and wide silhouettes characterizes the image of the colorful collection.

Be inspired by our new collection and discover a world of change and beauty.
